LANGUAGES

- English (Fluent)

PROJECT EXPERIENCE

Results Management System – HTML, CSS, JavaScript

- Built a secondary school results portal with automated result computation, class sections (JSS1–SS3), scratch card authentication, cumulative results, and student passport photo integration. Deployed on Vercel.
- Impact: Made result checking faster, eliminated manual errors, and increased school efficiency.

React Todo App – React, Tailwind, Shadcn UI

- Designed and developed a clean, responsive task management app with add, edit, delete, drag-and-drop, API integration, and accessibility features.
- Impact: Achieved fast performance and improved user experience through reusable components.

Credit Card Form UI – React, Tailwind

- Created a fully responsive credit card form with real-time input synchronization, form validation, and dynamic UI updates.

WORK EXPERIENCE

Freelance Frontend Developer

Remote — 2023 to Present

- Designed and shipped multiple client websites with professional UI and mobile optimization.
- Implemented authentication, CRUD functionalities, dashboards, and API-powered features.
- Improved website load speed using optimized assets and clean component architecture.
- Worked closely with clients to translate business needs into technical solutions.
